

**Food Contact Declaration USA**

According to the recipe used for the European manufacturing of **Akulon K224-G6 (natural)** this resin may be safely used to produce articles intended for use in processing, handling, and packaging food in accordance with 21 CFR 177.1500 (Nylon resins).

Akulon K224-G6 (natural) complies with the specifications for Nylon 6 resins listed in subsection 177.1500 (b) 6.1. The adjuvants are cleared according to Part 178 (Indirect food additives) or are generally recognized as safe (GRAS), or are prior-sanctioned food ingredients.

Status: April 1, 2009.

It is the responsibility of the legal entity responsible for placing on the market of the article to ensure that the usage of the articles is safe, lawful and technically suitable.

This declaration is restricted to Akulon K224-G6 (natural) as it leaves the production facilities.

This declaration does not cover:

- Any substance subsequently added or processing steps undertaken by any other third party
- Poor material or end product due to inexpert manufacture by any other third party
- Any negative influence of the finished article on the organoleptic properties of the food.

This declaration has been prepared and issued on the basis of currently applicable laws and regulations and our best knowledge and expertise currently available; the addressee or recipient is advised to regularly request updates hereof. This declaration replaces all previous ones relating to this subject.

The General Conditions of Sale of the entity selling this product apply to and are part of all our quotations, offers, agreements, sales, deliveries and all other similar dealings, unless explicitly agreed otherwise by means of a duly and mutually executed document.

On behalf of the manufacturer,

Ir. G.P.J.M. Tiemersma-Thoone  
Product Safety Expert
